

THE VALUE OF CAMP MAINTENANCE TRACKING

A Benefits Reference for Embraer Executive Jets Customers

An Introduction to CAMP Systems and CAMP Maintenance Tracking

Embraer has selected CAMP Systems International as the preferred maintenance tracking provider for Embraer Executive Jets. CAMP has a rich history of supporting the business aviation community with its advanced, web-based technology and in-depth support services.

CAMP's flagship product, Maintenance Tracking, has been designed to help you, the aircraft owner/operator, manage the maintenance and regulatory compliance of your jet. In addition to regulatory compliance, there are many reasons why it is important to be on the manufacturer's maintenance program including Resale Value, Safety, Scheduling and Cost Effectiveness, just to name a few.

We invite you to review the benefits of utilizing CAMP.

Safety and Efficiency

CAMP helps you make sure that your aircraft is ready to go when you are. Convenience and flexibility were likely on the list of reasons why you opted to purchase your jet. To keep these at the top of the list you need to make sure that all systems are in top operating order. CAMP helps you:

- Make sure that your Embraer jet is precisely maintained and safe at all times (CAMP strictly adheres to Embraer's maintenance program)
- Schedule maintenance that is coming due
- Project future maintenance
- Nearly eliminate the occurrence of unscheduled downtime
- Provide the data your Service Center needs to perform maintenance. With your authorization, CAMP can make your aircraft's records accessible to your Service Center.
- Maintain your Phenom's P&WC engines through Engine Condition Trend Monitoring (ECTM). ECTM is the routine tracking, collection, and examination of aircraft data in order to identify, maintain and maximize operational performance.

Don't let maintenance interfere with your travel plans or finances. CAMP lets you know in advance when maintenance needs to be done so that you can plan ahead and control costs.

Tracking Your Jet

Tracking the maintenance of your jet requires accuracy and detail. The figures below show just how much data must be tracked on your Embraer Jet. This reflects the number of Inspections, Components, Service Bulletins and AD notes currently being tracked for each model:

Phenom 100	over 1,000	Legacy 600/650	over 3,500
Phenom 300	over 1,200	Lineage 1000	over 4,000

Value Protection

CAMP helps you protect your valuable asset. There may come a time when you will want to sell your aircraft. Perspective buyers will want to see the maintenance history of your aircraft, both completed and coming due. CAMP's detailed record keeping of your maintenance data makes this request easy to fulfill. The result is a higher resale value and a more marketable aircraft.

Regulatory Compliance

Regulatory authorities around the world place the responsibility of operating a safe aircraft on the owner/operator. CAMP can assist you in fulfilling that responsibility. CAMP tracks and archives each and every maintenance event on your jet. Did you know that there are over 1,000 items that you are responsible for tracking on your Phenom 100, and even more on the Phenom 300, the Legacy 600/650, and the Lineage 1000. (see side bar for details)

- CAMP has the most extensive database of aircraft maintenance and compliance requirements in the world. Data is continually changing and you are expected to be familiar with every change including:
 - Chapters 4 & 5, revised periodically throughout the operating life of the aircraft
 - Service Bulletins, released regularly
 - Component Replacements
 - Compliance Update
 - Airworthiness Directives
- CAMP meets government regulatory requirements for aircraft operated under ANAC, FAA, EASA, Transport Canada, CASA, and others.
- If you miss a requirement you run the risk of incurring expensive fines and having your aircraft grounded. CAMP can help you avoid costly non-compliance fines and unscheduled downtime.
- CAMP's Document Management allows you to archive additional important documentation such as wiring diagrams, supplemental maintenance manuals, ICA's and more.
- Easily retrieve your aircraft logs and documents from anywhere, at any time with an Internet connection and browser. Your aircraft records are kept on CAMP's secure, redundant server making it quick and convenient to collect documentation for audits, maintenance or even resale.

Trust, Experience and Peace of Mind

CAMP is a name you can trust. With over 40 years experience, CAMP is recognized as the compliance expert for business category aircraft. CAMP melds technology with the basic philosophy that professional level maintenance tracking is much more than software; it is a service. For this reason the following support is readily available to Embraer owners and operators:

- A dedicated Aircraft Analyst for both quality control and support
- An Application Support Team for answers to your "how-to" questions
- Regional Field Service Representatives (FSR) strategically positioned across the globe
- A dedicated FSR located at the São José dos Campos facility
- Webinar training conducted live by the Application Support Team
- Video training via YouTube™ (www.youtube.com/fieldservicerep)
