

Aircraft Enhancements Legacy 600/650

CPDLC FANS-1/A

The Future of Aviation is Now: Stay informed

Controller-to-Pilot Data Link Communication replaces the uncertainty inherent in voice links between you and air traffic control with a safe, clear, concise and understandable line of communication that reduces pilot workload and ensures your safety.

Key benefits for you

Reduce pilot workload

Improve flight safety

Aircraft operation in airspace where CPDLC is required

It's an enhancement that makes all the difference

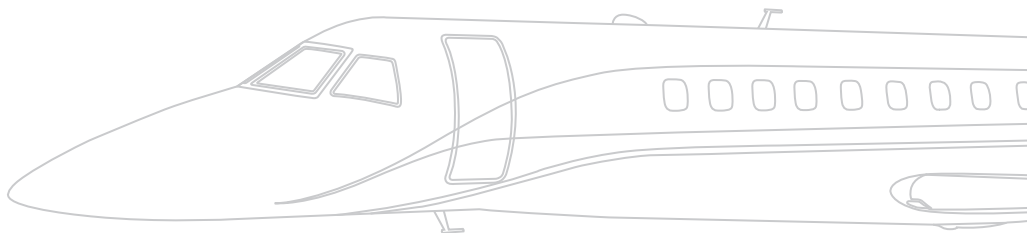

Pre-formatted text messaging between air traffic control and pilot allows for ATC clearances, pilot requests and position reporting

Integrated with aircraft display and aural warning system

Communicate through ACARS network over VHF radio and/or satellite communications for oceanic operations

Designed and fully supported by Embraer

Be prepared for new regulations
