

**Aircraft Enhancements
Phenom 100**

ADS-B OUT

Tomorrow's Control, Today

A cornerstone of next generation air traffic management systems, Automatic Dependent Surveillance-Broadcast is a safe, efficient and accurate technology that improves control in congested airspace.

Key benefits for you

Improving flight safety

More direct routing, saving you both time and fuel

Aircraft operation in airspace where ADS-B Out is required

It's an enhancement that makes all the difference

Single or dual Mode S transponder with ADS-B Out functionality

Identification, position, velocity, and heading information are automatically transmitted to other aircraft and ground stations

Seamless integration with avionics suite

Designed and fully supported by Embraer

Be prepared for new regulations
