

**Aircraft Enhancements
Phenom 300**

CPDLC

**The Future of Aviation is Now:
Stay informed**

Controller-to-Pilot Data Link Communication replaces the uncertainty inherent in voice links between you and air traffic control with a safe, clear, concise and understandable line of communication that reduces pilots workload and ensures your safety.

Key benefits for you

Reduce pilot workload

Improve flight safety

Aircraft operation in airspaces where CPDLC is required

It's an enhancement that makes all the difference

Pre-formatted text messaging between air traffic control and pilot

Integrated with aircraft display and aural warning system

Designed and fully supported by Embraer

Use the VHF Datalink Mode 2 air-to-ground network to send and receive data

**Be prepared for
new regulations**
